PRINCIPAL'S MESSAGE

Dear parents and esteemed readers,

It gives me immense joy to extend my greetings through this edition of our E-magazine.

This digital platform not only reflects the creativity and talents of our students and staff but also captures the vibrant spirit that animates our college.

Education is not confined to classrooms alone; it is about shaping lives, instilling values, and nurturing dreams. Each article and report featured here is a testimony to the hard work, imagination, and dedication of Agnesian family.

Agnathon -2k25 with the unique theme 'Animergenz -Dare to begin, destined to win' was one of the exiting events of the month that captured attention of all. As you browse through these pages, I encourage you to pause and appreciate the milestones achieved, the talents expressed, and the collective efforts that make our institution a nurturing ground for growth. Let this magazine inspire us all to continue striving for excellence while upholding the values of integrity, compassion, and service.

My heartfelt appreciation goes to the editorial team, contributors, and every individual who has worked behind the scenes to bring this edition to life. May this e-magazine be a source of inspiration, joy, and pride to every reader.

KNOWLEDGE FAIR

Library has always been more than just a room filled with books—it's a space for quiet thinking, deep learning, and endless imagination. But during **Library Week 2025**, the library transformed us into something even more vibrant: a place of creativity, competition, laughter, and connection. The week-long celebration began on July 28 with a Book Exhibition that turned heads and drew crowds. Organized in collaboration with Nava Karnataka Publications, the exhibition featured a wide range of books—everything from children's storybooks to self-help titles, drawing books to romance novels, and historical reads to comedy. It was a display that reminded everyone, no matter their age or interests, that there's a book out there for them.

We were honoured to welcome Sr Jyotsna, Headmistress of St Agnes Kannada Primary School, as our Chief Guest. Her speech was both inspiring and heartfelt, reminding students and teachers alike of the power of reading—not just as a habit, but as a lifelong companion. The atmosphere that day was one of discovery, with students and staff exploring the exhibits, flipping through titles, and sharing their own reading recommendations.

Library Week didn't stop at browsing books. What followed were a series of interactive games and activities that brought the entire college together. One of the early favorites was "Stack It", where students raced around the library shelves to find books and arrange them in alphabetical order. It was fast, fun, and just a little bit chaotic. "Book Bowl" turned up the heat with a quiz competition that tested teams on everything from authors and genres to famous literary quotes.

Then came "Read, Remember, Repeat", a deceptively simple game that challenged students to memorize and recall a list of book titles. Not as easy as it sounds—but definitely entertaining. For the more artistic crowd, "Title and Tint" allowed students to repaint and redesign book covers, giving classic titles a fresh and modern twist.

Perhaps the most adventurous of all was “Bibliotreasure”, a high-energy treasure hunt that had students running across the campus, solving literary clues and uncovering hidden spots. It brought out everyone's competitive side, but more than that, it encouraged teamwork and thinking outside the box.

The week also included special events for our teachers, who were more than happy to join in the fun. In “Ink and Opinion”, teachers selected a book from the library and wrote thoughtful, honest reviews—giving us a glimpse into their personal reading journeys. And in “Secrets of the Stack”, a clue-based treasure hunt just for faculty, teachers teamed up to solve riddles and explore the campus in a way many hadn't in years. It was light-hearted, refreshing, and filled with laughter.

What made Library Week so special wasn't just the activities—it was the energy it brought to the entire college. There was something for everyone. Whether you were competing, creating, reflecting, or simply wandering through the exhibition, the week offered a space to reconnect with books—and with each other.

A heartfelt thank you to the library staff, organizers, student volunteers, and faculty who made the event such a success. Their dedication turned an idea into an unforgettable experience.

Library Week 2025 reminded us all that libraries aren't just about shelves and silence. They're about stories, discovery, and community. And at St Agnes PU collage, we were lucky to experience all of that and more.

HOW PROUD AM I TO BE AN INDIAN

India is my country, and I am proud to be an Indian. India is not just a place. It is a feeling of love, culture and unity. Our country is full of different people, languages, foods and traditions. But even with all these differences, we live together like one big family. This is what makes India special, and I am proud to be a part of it. India is a land of great history, culture and diversity. It is one of the oldest countries in the world, with a rich past full of wisdom, bravery and learning. India gave the world many important things like yoga, Ayurveda and the number zero. Our freedom fighters like Mahatma Gandhi, Bhagat Singh and Rani Lakshmi Bai fought bravely so that we can live in a free country today.

India is known for its “Unity in Diversity”. People from different religions, languages and cultures live together peacefully, we celebrate many festivals like Diwali, Eid, Christmas and Pongal and people from all backgrounds enjoy them together. This makes India a special and unique country.

India is also growing fast in science, technology and sports. Our scientists have sent rockets to the moon and Mars. Indian doctors, engineers and artists are respected all over the world. We have beautiful dance forms like Bharatanatyam, Kathak and Bangra. Classical music, Folk songs and many art forms. Our traditional cloths like sarees, kurtha-pajamas and turbans are unique and beautiful.

Indian values teach us to respect our elders, help others and live in peace. I feel lucky to be born in a country where love, kindness and courage are part of daily life.

I will always be proud to be an Indian and do my best to make my country proud of me.

Jai Hind!

INDEPENDENCE DAY CELEBRATION

Officer Cadet Sudeep Raj was the Chief Guest at the 79th Independence Day Celebration on Campus.

CAREER EXPO

The **Career Guidance** for Commerce and Arts students was organized by "Draw My Career" that turned out to be truly informative and beneficial for me. The event commenced with a short program which was graced by our Principal Sr. Norine D'Souza, the resource person Mr. Naveen Paul – CEO & Co founder of Draw My Career, along with his team.

Talking about the session, Mr. Naveen Paul delivered an inspiring talk. He gave us the importance of being aware of opportunities and making thoughtful decisions regarding the future. He also stressed on not to aim for the BEST college, course or career but choose the RIGHT college, RIGHT course & RIGHT career according to our interests & strengths. He threw light on the fastest growing & declining fields and also various emerging career options such as data science, sports, actuarists, fintech etc. He strongly emphasized the need to follow our passion & decide now.

After the session, we had a lab assessment through which the organizers analyzed the personal abilities of the students. This gave us a clearer picture of career paths which suits us.

Overall, this Career Guidance Program was a motivating and inspiring experience that not only broadened my knowledge but also encouraged me to reflect deeply on my own career journey.

CAREER EXPO

St Agnes PU College organised a **Career Guidance** programme for the 2nd PU students of Commerce and Arts, and their parents on 18th of August in collaboration with 'Draw My Career' team. The programme aimed at providing students with valuable insights and guidance to make informed decisions about their future career and to empower parents to play a supportive role in their children's career development and decision-making process.

An overview of various career options, entrance examinations and opportunities available to Commerce and Arts students, including fields like Management, Finance, Economics, Marketing, Hospitality, Law, Communication, Media, Humanities and Social Sciences was given to the students and the parents. It was an interactive session where students and parents were encouraged to ask questions and seek guidance on career-related concerns. Later the Psychometric Test was administered to the students as a tool to identify their strengths and interests.

Through this programme, students gained a better understanding of various career options and opportunities. They learnt about the importance of self-assessment and exploration in career planning. This programme also gave an idea for the students to develop essential skills and stay updated with industry trends.

In conclusion, the 'Career Expo 2025' was a great success, providing students and parents with valuable insights and guidance to make informed career decisions

AGNATHON 2K25

AGNATHON 2K25 was held on 30 August 2025 with an innovative theme **ANIMERGENZ** – an exciting blend of Gen Z spirit and anime culture. The event began with a Guard of Honour ceremony as the chief guests, Ms. Muntia Veigas Rao, playback singer, vocal trainer and producer and VJ Dixon, TV anchor, fashion model and influencer, made their way to the auditorium, greeted by thunderous applause. The stage was beautifully decorated with anime fandom elements, including a curious Pokéball on the side. The guests were welcomed with a stunning dance performance that instilled a sense of pride, before the dignitaries marked the occasion's start by lighting up the **Sakura Agnesian** tree with lanterns. Cherry blossoms symbolize fresh beginnings and lighting of the Sakura Agnesian tree represented a new start for the fest. The mystery of the Pokéball was revealed as it opened to unveil the stars of the show—the trophies!

The event provided an opportunity for students from different schools and colleges to showcase talent and creativity through numerous solo and group competitions.

The first event was **Animode**, the opening round of **Astrazein**, a cosplay competition where participants portrayed various anime characters.

Desi VibeZ filled the auditorium with retro vibes, while **Fuego Beats** transcended language barriers through music.

Gen Z Glam, a fashion show, showcased remarkable confidence and style, while the dance competitions that followed, **Hashtag Humanity** and **GenSwap** were packed with energy, fire, and fantasy.

At the same time, a number of different events were taking place in different venues, which made the day vibrant and memorable.

After a few more animated performances, the most anticipated moment arrived: the prize distribution. Winners of various events were celebrated with cheers from their friends. The overall champions, including my alma mater, received a thunderous applause. Being a part of the audience and encouraging the winners while they accepted the trophy was what I enjoyed most. The evening concluded with a lively mass dance, as all great events do!

ORATIO - GAIN COURAGE & CONFIDENCE

During our English class this week, Oratio Club Activity was conducted to improve our speaking skills. The activity began with the Word of the day which we had to try in our conversation. I gave the Icebreaker speech and honestly I was nervous in the beginning. But as I started speaking, I gradually gained confidence and by the end I enjoyed the experience of putting forward my thoughts. Later we had the table topics session where my friends were asked to speak on the given topics. It was interesting to see how each one spoke in their own way. The whole activity was filled with learning and encouragement.

OUR DRONE DREAM TAKING FLIGHT

A small idea has slowly grown into something really exciting – we are building a drone! What started as a curious discussion among a few students has now turned into a real project, a group of students came together to form a team called "techspire" which focuses on the engineering mechanical, robotics and electronics and learning along the way. With the support of our teachers Ashwin and Joel we are exploring how drones work and how science and technology can be turned into something practical.

The process has not been easy. We've spent hours figuring out how to balance the frame, connect the circuits, and program the controls. Sometimes the drone doesn't respond the way we expect, but those moments teach us patience and problem-solving. Each little success – like getting the propellers to spin correctly – feels like a big achievement for the whole team.

More than just a flying machine, this drone has become a symbol of teamwork, creativity, and determination. We are excited to see it finally take off one day and even dream of using it for fun projects like photographing our college from the sky. This journey is showing us that when we work together, even the craziest ideas can really take flight.

AGNITIO - SOMETHING DIFFERENT

As an audience and a participant, I found the “Logo and Tagline Hunt” interesting organized by Agnatio - the Commerce club. The session aimed to test how well we recognize popular brands and their taglines, connecting what we study in class with the real corporate world.

The activity started with a vibrant introduction by the Teacher, after which we were shown a series of logos and catchy taglines from well-known companies across different industries—technology, automobiles, FMCG, and even startups. It was really fun trying to recall brands we see every day but often take for granted.

The competition brought out our team spirit and quick-thinking skills. Some of the taglines, like those of old brands, made us rack our brains, while the logos of trending companies sparked lively discussions. By the end of the activity, not only did we learn about the importance of branding and marketing, but we also realized how business companies build their identity in our minds through simple visuals and words.

The winners were appreciated with applause, but what stood out the most was the enthusiasm and energy in the room. The event was both fun and educational, helping us link textbook concepts to real-world business strategies.

Being a part of this event made me feel more connected to the subject and more curious about how companies build their brand images. It was truly a memorable and enriching experience.

SRISHTI

When students bring out art and nature together, learning becomes joyful and creative. These simple activities not only spark imagination, also teach care for the environment. The students of St Agnes blended creativity with sustainability through a series of fun, nature inspired activities.

Earthly easel – students designed eco-friendly tote bags with nature inspired art, reducing the use of plastics.

In Ecosphere, building a life in a bottle where students understand ecosystem and importance of balance in nature.

Ecocanvas – Through sketches and colour on paper, students captured the beauty of trees, flowers, landscapes. They designed their own sketches just by looking at the nature and by feeling the presence and calmness of nature.

The chirpy life had students craft bird feeder from recycled material allowing them to support local wildlife and enjoy cheerful bird songs.

Floral whimsy-brought joy as students arranged flower in artistic display. It encouraged students to appreciate colours texture and the delicate charm of blooms. These activities not only nurtured creativity but also taught students the importance of caring for nature proving that art and environment truly go hand in hand. These activities also reflected the spirit of science students –observant. Innovative and inspired by the natural world. It also helps them to build a deeper bond with nature.
